THE NOTEBAERT  
NATURE  
MUSEUM

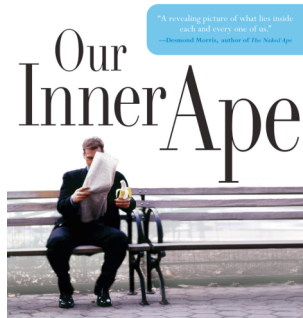

## Lincoln Park Zoo and the Notebaert Nature Museum invite you to join us for a lecture by Frans de Waal!

A fascinating and surprising exploration of our humanity, as seen through the behavior of our closest primate kin.

World renowned primatologist and author of *Chimpanzee Politics and Bonobo: The Forgotten Ape*, Frans de Waal is a pioneer in the exploration of human behavior evolution as a reflection of our primate cousins. His latest book, *Our Inner Ape*, challenges our understanding of "human nature" and leads us to question ourselves, and our behavior. Thoughtful and provocative, *Our Inner Ape* reveals the connections we share between chimps and bonobos, and human beings.

FRANS DE WAAL

A Leading Primatologist  
Explains Why We Are  
Who We Are
