

APPENDIX B:

MEMBERS OF THE COMMISSION ON RESEARCH AT EMORY

JULIETTE STAPANIAN APKARIAN, associate professor of Russian, received a PhD from the University of Wisconsin-Madison in 1980. Apkarain has received funding from the International Research and Exchanges Board (IREX) and the National Endowment for the Humanities. She is author of “Mayakovsky’s poetic ‘vision’ ” in *For The Voice: Mayakovsky/Lissitzky* (2000), “Elena Guro” in *Russian Women Writers, vol. I*, (1999), and “Ironic ‘vision’ as an aesthetics of displaced truth in *Bulgakov’s Master and Margarita in Varieties of Seeing: Essays on Russian Visual and Narrative Art* (1994). *The Cubo-Futurist ‘Vision’ of V. Mayakovsky* (1986) was nominated for a George Freedley Memorial Award. She was also the recipient of a fellowship from Fulbright-Hays.

GEORGE BENSTON, John H. Harland Professor of Finance, Accounting, and Economics, received a PhD in economics from the University of Chicago in 1963. He joined the Emory faculty in 1987. He is the John H. Harland Professor of Finance, Accounting, and Economics in Goizueta Business School and professor of economics in the Emory College. Benston presently serves as coeditor of the *Journal of Financial Services Research*, and as an associate editor of the *Journal of Money, Credit and Banking; Journal of Applied Corporate Finance; Research in Financial Services Annual; Managerial and Decision Economics; and Accounting and Public Policy and Accounting Horizons*. He was a Woodrow Wilson Fellow in 1958–1959, a John M. Olin Distinguished Visiting Fellow at Templeton College of Oxford University in 1987, and the nineteenth Henry Thorton Lecturer at the City University in London during October 1997. He previously was on the faculties of the University of Rochester, University of Chicago, and Georgia State University.

LUCAS CARPENTER, Charles Howard Candler Professor of English, Oxford College, received a PhD in American literature from the State University of New York at Stony Brook in 1982. He joined the Oxford College faculty in 1995. He is author of *John Gould Fletcher and Southern Modernism* and is general editor of and principal contributor to the seven-volume *John Gould Fletcher Series* published by the University of Arkansas Press. Carpenter is author of *A Year for the Spider*—based on his experiences as a soldier in Vietnam—which won the University of North Carolina Pitcher Poetry Series Award. His poems, stories, reviews, and essays have appeared in many prominent journals and magazines. Carpenter also taught at the Katholieke Universiteit Leuven in Belgium as a Fulbright Distinguished Scholar.

DAVID CARR, Charles Howard Candler Professor of Philosophy, earned a PhD in philosophy from Yale University in 1966 and joined the Emory faculty in 1991. He was chair of the Department of Philosophy from 1992 to 1998, and he has also served as acting chair and as acting director of graduate studies. Carr has received grants from the Alexander von Humboldt Foundation and the Social Sciences and Humanities Research Council of Canada. He is author of numerous articles on phenomenology, the philosophy of history, the theory of narrative, and on transcendental philosophy from Kant to Husserl, and of the following books: *Phenomenology and the Problem of History*; *Time, Narrative and History*; *Interpreting Husserl*; and *The Paradox of Subjectivity: The Self in Transcendental Tradition*. He also translated Husserl's *The Crisis of European Sciences*.

ALBERT MORGAN CLOUD III, Charles Howard Candler Professor of Law, earned a JD at Cornell University in 1977 and joined the Emory faculty in 1983 after practicing law as a trial lawyer and litigator in Florida and California. He is program director for the National Institute for Trial Advocacy and regularly lectures to professional groups throughout the country. Cloud serves on the advisory board of the *Green Bag*, a journal devoted to legal history and legal policy issues. He has published numerous articles on issues of constitutional theory, jurisprudence, and legal history in leading journals, including the *University of Chicago Law Review*, *Stanford Law Review*, *Texas Law Review*, *Southern California Review*, *Emory Law Journal*, and *UCLA Law Review*.

SAMUEL DUDLEY, assistant professor of medicine and physiology, received an MD and a PhD in physiology from Medical College of Virginia in 1989 and 1991, respectively, and joined the Emory faculty in 1997. His research concentrates on quantitative biological approaches to cardiovascular disease including gene targeting, myocyte culture, electrophysiology, fluorescence, and electrochemistry. He has received funding from the Veterans Administration, NIH, and Proctor & Gamble, among others. Dudley has served as an ad-hoc reviewer for the *American Journal of Physiology*, the *Biophysical Journal*, *Cells, Tissue and Organs*, *PACE*, and *General Pharmacology*. He has authored more than twenty-seven peer-reviewed publications and book chapters, including “Pore-blocking toxins as probes of voltage-dependent channels: What can they tell us?” (with R. J. French in 1998) in *Methods in Enzymology*. He was named the AstraZeneca Cardiovascular Young Investigator and Fellow of the American College of Cardiology in 1999, and Fellow of the American Heart Association in 2001. He earned the Pfizer Scholars Grant for New Faculty and became chief of the Division of Cardiology at the VAMC in Atlanta.

DWIGHT DUFFUS, professor of mathematics and computer science, received a PhD in pure mathematics from the University of Calgary in 1978 and joined the Emory faculty in 1979. Duffus studies ordered combinatorial and algebraic structures. He has published extensively in order and lattice theory, and he has had research programs supported by both the NSF and the ONR. He serves on the editorial board of the research journal *Order* and is a referee for numerous journals and funding agencies. He has directed or codirected several honors and masters theses, six doctoral students, and received the Emory Williams Award in 1986 for excellence in undergraduate teaching.

JAMES FOWLER, Charles Howard Candler Professor of Theology and Human Development, earned a PhD at Harvard University in Religion and Society in 1971 and joined the faculty of Candler School of Theology in 1977. His theory of faith development has earned international recognition. His best known book, *Stages of Faith: The Psychology of Development and the Quest for Meaning*, is in its thirty-fifth printing, and has been translated into German, Korean, and Portuguese editions. He has written or edited eleven other books and more than sixty articles, contributing to the fields of practical theology and theological ethics. Four volumes of critical discussion of Fowler's research and theory have emerged from national and international seminars devoted to his work. He has received the Oskar Pfister Award from the American Psychiatric Association and the William James Award from the American Psychological Association in 1994. In 1999 the University of Edinburgh awarded him an honorary doctorate of divinity.

SUSAN H. FROST, vice president for strategic development and adjunct professor in the Graduate Institute of the Liberal Arts and the Division of Educational Studies, earned an undergraduate degree from Agnes Scott College and an EdD from the University of Georgia in 1989 before joining the Office of Institutional Planning and Research as director in 1991. She organized and developed the university's first central institutional planning and research effort, has designed and implemented major planning initiatives, and has conducted comprehensive studies of faculty work and life at the university. In 2001 she established Emory's first strategic development effort as a part of the Office of the President. Frost's scholarly work concerns the evolving nature of the American research university and how that knowledge can be used to improve the academy. She is author or editor of three books: *Using Teams in Higher Education: Cultural Foundations for Productive Change*, *Inside College: Undergraduate Education for the Future (with Ronald Simpson)*, and *Academic Advising for Student Success: A System Shared Responsibility*. Her articles appear in the *Journal of Higher Education*, *Research in Higher Education*, and other journals. She consults with colleges and university on issues related to their strategic development and on the academic advising of undergraduate students.

KAREN HEGTVEDT, associate professor of sociology, received a PhD in sociology from the University of Washington in 1984, and she came to Emory in 1985. Her specialties include social psychology, socialization, emotions, and literature. Hegtvedt's current project investigates the nature of competing justice claims, the role of justice perceptions in work organizations, and the relationship between justice and legitimacy. A recently awarded NSF grant supports her evolving research on justice and legitimacy. Her publications include "Reactions to injustice: Factors affecting workers' resentment toward family-friendly policies" in *Social Psychology Quarterly*, 2002; "Justice beyond the individual: A future with legitimation" in *Social Psychology Quarterly*, 2000; and "Fairness and Emotions: Reactions to the Process and Outcomes of Negotiations" in *Social Forces*, 1999. In addition, Hegtvedt serves as chair of the Emory University Social, Humanist, and Behavioral Institutional Review Board and as a member of the national Social and Behavioral Sciences Working Group on Human Research Protections.

ARTHUR KELLERMANN is professor and chair of the Department of Emergency Medicine, School of Medicine, and director of the Center for Injury Control, Rollins School of Public Health. He received an MD from the Emory University School of Medicine in 1980 and an MPH from the University of Washington in 1985 before arriving at Emory in 1993. He was elected a member of the Institute of Medicine of the National Academies in 1999. Over the past eighteen years, Kellermann has published more than one hundred papers on various aspects of emergency cardiac care, health services research, and the role of emergency departments in the provision of health care to the poor. He is best known for his landmark research on the epidemiology and prevention of firearm-related injuries and deaths. Recent scholarship focuses on treatment of traumatic brain injuries and defining the consequences of uninsurance for individuals, families, and the country.

HARRIET M. KING, senior vice provost for academic affairs, received an undergraduate degree from Agnes Scott College, a JD from Vanderbilt, and an LLM from Harvard University in 1973. She has been vice provost for academic affairs at Emory University since 1992, and the senior vice provost since 1998. She is also an associate professor of law where she worked in the areas of contract, domestic relations, education, and insurance law. She has served as an arbitrator and mediator for various organizations and courts, and she currently serves as chair of the Board of Trustees of Agnes Scott College.

MICHAEL J. KUHAR, Charles Howard Candler Professor of Pharmacology, received a PhD in 1970 from Johns Hopkins University in biophysics and pharmacology and joined the faculty at Emory in 1995. Kuhar's research focuses on the brain, neuroscience, and neuropharmacology. He has published more than seven hundred articles, abstracts, book chapters, reviews, and patents, and his work is highly cited in the literature. His seminal studies are in the areas of neurotransmitter transporters, autoradiographic localization of drug receptors, PET scanning of receptors, mechanisms of action of cocaine, novel genes, and CART peptides. NIH, as well as foundations and industry, fund his work. The Georgia Research Alliance selected him as a Georgia Research Eminent Scholar in Molecular Neuropharmacology. The eminent scholars are selected for their ability to lead Georgia in biotech research.

HOWARD KUSHNER, Nat C. Robertson Distinguished Professor of Science and Society in behavioral sciences and health education, Rollins School of Public Health and Graduate Institute of Liberal Arts in Emory College, received a PhD in history from Cornell University in 1970. He came to Emory in fall 2000. His current research includes the etiology and history of Kawasaki's Disease and on historical and behavioral aspects of addiction, including smoking and illegal drugs. He is author of four books and numerous articles, including *A Cursing Brain? The Histories of Tourette Syndrome* (1999) and *American Suicide: A Psychocultural Exploration* (1991). His work has been supported by grants from the NEH, NLM, and the NIH. He serves as associate director of Emory's Center for Health, Culture, and Society and on the editorial advisory boards of the *Bulletin of the History of Medicine* and the *Journal of the History of Neuroscience*.

MICHELLE LAMPL, associate professor of anthropology, received a PhD in anthropology from the University of Pennsylvania in 1983 and an MD from the University of Pennsylvania in 1989 before joining the Emory faculty in 1994. She specializes in human growth and development, medical anthropology, infant saltation (growth spurts), nutrition, eating disorders, and paleo-anthropology. Her publications include “Saltation and stasis: A model of human growth,” *Science* (1992); “Is growth saltatory?” *Endocrinology* (1996); “Patterns of ontogeny in human evolution,” *Yearbook of Physical Anthropology* (1990); and “Problems in the aging of skeletal juveniles,” *American Journal of Physical Anthropology* (1996).

LANNY S. LIEBESKIND, Samuel Candler Dobbs Professor of Chemistry, received a PhD in 1976 from the University of Rochester and joined the Emory faculty in 1985. Liebeskind has published more than 125 research papers in peer-reviewed journals and has served for more than twelve years as an associate editor of the journal *Organometallics*. He was an associate editor of the *Encyclopedia of Reagents for Organic* and the editor of *Advances in Metal-Organic Chemistry*. He was a chair of the National Institutes of Health Medicinal Chemistry A Study Section, a member of the Advisory Board of the Petroleum Research Fund of the American Chemical Society, and a consultant to R. W. Johnson Pharmaceutical Research Institute, Bristol-Myers Squibb Company, and Union Carbide Corporation. Liebeskind is the recipient of an Alfred P. Sloan Foundation Fellowship, a Camille and Henry Dreyfus Foundation Teacher-Scholar Award, and an Alexander von Humboldt Senior Scientist Research Award. In 1997 he received the prestigious Clifford C. Furnas Memorial Award from the State University of New York at Buffalo and most recently (May 2002) was recognized with the Herty Award of the Georgia Section of the American Chemical Association.

KIM LOUDERMILK, director of Special Academic Projects, received a PhD from Emory's Graduate Institute of the Liberal Arts in 1997 and spent two years as a visiting assistant professor in Interdisciplinary Studies in Society and Culture. After three years as assistant vice provost, where she directed Emory's self-study for the SACS reaffirmation process, she joined Emory College as director for Special Academic Projects and adjunct assistant professor in the Graduate Institute of Liberal Arts in April 2003. As director, Loudermilk is working with the college to determine strategic priorities and develop procedures for internal review. She continues to teach courses in interdisciplinary studies, and her manuscript, *Fictional Feminism: How American Bestsellers Affect the Movement for Women's Equality*, is forthcoming from Routledge.

DAVID G. LYNN, Asa Griggs Candler Professor of Chemistry, earned a PhD in organic/biological chemistry at Duke University in 1977 and joined the Emory faculty in 2000. Lynn is an internationally recognized researcher and teacher in the general areas of molecular self-assembly, molecular evolution, and chemical biology. He is widely known for studies on signals and signal transduction events mediating host-pathogen interactions, developing methods for reading the information encoded in DNA into different polymers, and the structure of the amyloid fibril associated with Alzheimer's disease. He is the recipient of the Camille and Henry Dreyfus Teacher-Scholar Award, Sloan Research Award, and Howard Hughes Medical Institute Professorship.

REYNALDO MARTORELL, Robert W. Woodruff Professor of International Nutrition, earned a PhD from the University of Washington in 1973 and joined the Emory faculty in 1993. Martorell's research in Mexico and Guatemala demonstrates that improved nutrition in early childhood leads to enhanced human capital in young adulthood, including better physical status and intellectual functioning. Recently Martorell has become interested in the emergence of obesity and related chronic diseases of dietary origin in developing countries. Martorell has chaired or been a member of several committees of the National Academy of Sciences/Institute of Medicine, and he is a consultant to the World Bank, UNICEF, and WHO. Recent awards include the 1999 McCollum International Lectureship Award from the American Society for Nutritional Sciences, and Emory selected him to give the fifth Distinguished Faculty Lecture in 2000. He was elected to the Institute of Medicine in 2002.

BRYAN D. NOE is professor of cell biology, School of Medicine, and interim dean, Graduate School of Arts and Sciences. He received a PhD in 1971 from the University of Minnesota and came to Emory in 1972. Noe's research interests have centered on the structure and mechanism of action of enzymes responsible for the post-translational processing of peptide hormone precursors. He has published more than sixty peer-reviewed papers and book chapters. From 1991 to 2003, he served as the director of the Graduate Division of Biological and Biomedical Sciences. In 2000 Noe was appointed to the position of the associate dean for research in the Graduate School of Arts and Sciences.

KATHY PARKER, professor of nursing, joined the Emory faculty in 1989 and received a PhD from Georgia State University in 1990. She specializes in nephrology, neurology, sleep disorders, and renal failure, particularly focusing on the effects on hemodialysis on sleep. Her research is funded by the NIH. In 2000 she received the Distinguished Alumni in Nursing Award from the Emory Alumni Association, and in 1995 her manuscript "Dream Content and Subjective Sleep Quality in Chronic Hemodialysis Patients" was nominated for the Annual Research Writing Award given by the American Nephrology Nurses Association.

LAURIE PATTON, associate professor of religion and Winship Distinguished Research Professor in the Humanities, received a PhD from University of Chicago in 1996, the same year she joined the Emory faculty. Her methodological interests include comparative mythology and literary theory in the study of religion. In addition to thirty articles on early Indian religion, Celtic mythology, and theory in the study of religion, she is author of *Myth as Argument: The Brhaddevata as Canonical Commentary* (1996), and editor of *Authority, Anxiety and Canon: Essays in Vedic Interpretation* (1994), as well as *Myth and Method* (1996). Her edited volume on gender in the Hindu tradition, *Jewels of Authority: Women and Text in the Hindu Tradition*, appeared from Oxford University Press in 2002. A book on vedic mantra in human sacrifice, *Bringing the Gods to Mind*, is due out in 2004 from University of California Press. Her translation of the Bhagavad Gita will appear in the Penguin Classics series in 2004. She is also author of a recent volume of poetry, *Fire's Goal: Poems from a Hindu Year* (White Cloud Press, 2003).

LESLIE A. REAL, Asa Griggs Candler Professor of Biology, earned a PhD from the University of Michigan in 1977 and joined the Emory faculty in 1998. Real's research focuses on the ecology and evolution of infectious diseases, and he has received numerous grants from NSF and NIH. He has received fellowships from the Rockefeller Foundation, Rosenstiel Foundation, and the Institute for Advanced Studies (Jerusalem). Real has served on numerous national and international committees including the National Research Council Board on Environmental Studies and the Science Advisory Board of the EPA. He is currently establishing Emory's new Center for Disease Ecology, a multischool initiative exploring the ecological and evolutionary conditions for infectious disease emergence and spread.

ROBERT R. RICH is professor of medicine, microbiology and immunology, and executive associate dean for research and strategic initiatives, School of Medicine. He received an MD from the University of Kansas in 1966. He came to Emory in 1998 from Baylor College of Medicine where he was the vice president and dean of research and Distinguished Service Professor of Microbiology and Immunology and Medicine. He is editor-in-chief of the *Journal of Immunology* and is also editor-in-chief of the comprehensive textbook *Clinical Immunology: Principles and Practice*. He served as a member and chair of two NIH Study Sections and on the boards of several national medical societies. He also served as president of the Clinical Immunology Society and as vice president of the American Academy of Allergy, Asthma, and Immunology. He recently completed a term as president and chair of the Board of the Federation of American Societies for Experimental Biology, the largest coalition of biomedical research scientists in the United States.

RICHARD ROTHENBERG is professor of family and preventative medicine and professor of medicine, School of Medicine, and professor of epidemiology in the Rollins School of Public Health. He received an MD from Harvard in 1966 and joined Emory in 1993 after a twenty-five-year career at the Centers for Disease Control and Prevention (CDC), where he served as the associate director for science in the National Center for Chronic Disease Prevention and Health Promotion. Rothenberg has examined the dynamics of transmission of infectious diseases, with particular emphasis on the effects of social and sexual networks on transmission. His research has received funding from the NIDA, NICHD, and NIAID. He has published more than one hundred peer-reviewed articles, primarily in the fields of STD, HIV, and epidemiologic methods. He served as senior scientific editor for the 1992 and 2000 Surgeon General's Reports on Smoking and Health. Rothenberg is an attending physician for the Infectious Disease Consulting services and is currently editor-in-chief of the *Annals of Epidemiology*.

RICHARD RUBINSON is professor of sociology and interim associate dean, Graduate School of Arts and Sciences. He received a PhD in sociology from Stanford University in 1974 and joined the Emory faculty in 1989. He specializes in political economy of development, political sociology, sociology of education, and organizations. His current research focus is on comparative studies of industrial regulation, as well as schooling, state, and economy in East Asia. His publications include “The sociology of educational expansion,” *Sociology of Education*, 1999; “Education and the economy” (coauthor), *The Handbook of Economic Sociology*, 1995; *The Political Construction of Education* (editor), 1991; and “Class formation, political organization, and institutions,” *American Journal of Sociology*, 1986.

LUTHER E. SMITH JR., professor of church and community, received a PhD in American studies from St. Louis University in 1979 and joined the Emory faculty in 1979. He is senior associate editor for the *Howard Thurman Papers Project*, the second-largest project of its kind on an African American, which will result in the publication of three annotated volumes of his work. His current research focuses on cultivating congregations for the spiritual formation of youth, and he is currently working on a book-length manuscript on the meaning of hope. Smith’s publications include *Howard Thurman: The Mystic as Prophet* (1991) and *Intimacy and Mission: Intentional Community as Crucible for Radical Discipleship* (1994). He also edited *Pan-Methodist Social Witness Resource Book* (1991). He received the 1975 Distinguished Service Awards from both the St. Louis Jaycees and the Mid St. Louis County Jaycees, and he has been inducted into the International Society of Theta Phi, Omicron Delta Kappa, and Morehouse College’s Martin Luther King Jr. Collegium of Scholars.

CLAIRE E. STERK, Charles Howard Candler Professor of Public Health, received a doctorate in cultural anthropology in 1983 from the University of Utrecht and a PhD in sociology in 1990 from Erasmus University Rotterdam. She joined the Emory faculty in 1995. Sterk has received grants from NIH, CDC, and the Foundation for Child Development. She is author of *Vieze kereltjes: Zedenpolitie en vrouwen (Dirty old men: Vice squad and women)*, *Fast lives: Women on crack cocaine*, and *Tricking and tripping: Street prostitution during the AIDS era*. In addition, she has written more than seventy-five peer-reviewed articles, book chapters, and other publications. She has received awards such as the Scholarship Award from the Women and Science Foundation, Amsterdam, the Thomas F. Sellers Award in Public Health, and a Rosalynn Carter Fellow in Women's Studies.

REBECCA STONE-MILLER, associate professor of art history and faculty curator of art of the ancient Americas, received a PhD in the history of art from Yale University in 1987. She joined the Emory faculty in 1996. Her research interests include Andean art and architecture, Costa Rican sculpture, museology, perceptual theory, and art and shamanism. Her publications include *Art of the Andes from Chavin to Inca*, 1995; *To Weave for the Sun: Andean Textiles in the Museum of Fine Arts, Boston*, 1992; *Seeing with New Eyes: Highlights of the Michael C. Carlos Museum Collection of Art of the Ancient Americas* (2002); and articles on Chavin and Wari textiles, periodization, and camelid imagery. Currently she is working on *Flowers in the Dark: Shamanism and the Artistic Enterprise in the Ancient Americas*. Her book *Seeing with New Eyes* won the Association for Latin American Art 2003 Book Award.

FRANK G. STOUT, vice president for research administration, graduated from the University of South Dakota in 1971 and Tulane University Medical Center with an MPH with honors in 1977. He was appointed vice president for research administration at Emory University in September 2000. Stout was the deputy director of research administration at the Dana-Farber Cancer Institute of Harvard Medical School, the director of research administration at New England Medical Center, the first administrative officer for the University of Maryland (Systemwide) Center for Advanced Research in Biotechnology, and the vice president for research administration and acting vice president for clinical operations for the Tufts-New England Medical Center. He has been the principal investigator on several grants, served on many different review and advisory committees at NIH and other professional associations, served as a board member of several companies and biotech corporations, chaired committees on behalf of the federal court of Newark, New Jersey, and has published several articles.

KIM WALLEN, Samuel Candler Dobbs Professor of Psychology and Behavioral Neuroendocrinology, earned a PhD in neuroscience at University of Wisconsin-Madison in 1978. He joined the Emory faculty in 1979 as an assistant professor of psychology and a research scientist at Yerkes National Primate Research Center. Wallen is an associate editor of *Hormones and Behavior* and past president of the Society for Behavioral Neuroendocrinology and the International Academy of Sex Research. He edited the volume *Reproduction in Context* and has recently had research published in *The Proceedings of the National Academy of Science and Hormones and Behavior*. In 1993 he received a National Institute of Mental Health (NIMH) Research Scientist Career Development Award and recently completed a five-year NIMH Independent Scientist Award. His research is funded by NIMH and NICHD. He is the head of the Reproduction Collaboratory and Behavioral Technology Core of the Center for Behavioral Neuroscience.

STEPHEN T. WARREN, William Patterson Timmie Professor of Human Genetics, earned a PhD at Michigan State University in 1981 and joined the Emory faculty in 1985. His research focuses on heritable disease, particularly fragile X syndrome and neurodegenerative conditions. Warren was elected to the board of directors of the American Society of Human Genetics in 1997 and in 1999 became editor-in-chief of the *American Journal of Human Genetics*. In addition, he serves or has served on the editorial boards of the other major journals in human genetics and is the past chair of two review committees of the NIH. Among his awards are the Albert E. Levy Faculty Research Award from Emory University, the inaugural William Rosen Research Award from the National Fragile X Foundation, a MERIT award from NIH, and the William Allan Award from the American Society of Human Genetics.

CAROL WORTHMAN, Samuel Candler Dobbs Professor of Anthropology, earned a PhD at Harvard University in 1978 and joined the Emory faculty in 1986. Worthman's research interests include human reproductive ecology, developmental ecology, bio-cultural theory and research, comparative human biology, and life span/life history perspective. Her writing projects focus on embodiment, sex and gender, emotion, growth faltering, and ecology of breast-feeding. She edited *Hormones, Health, and Behavior* (1999) and has published articles in *Journal of Developmental Behavioral Pediatrics* and *American Journal of Human Biology*. Her current work focuses on the relationship of normal puberty to the onset of depression and other forms of distress, comparative life span endocrinology, and stress in the street children of Kathmandu.
