Tech Tools for Retirees I:
Using “smart” gadgets: iPhone and iPod Touch as lifestyle tools

Join us for an excursion to main campus to learn about “Tech Tools for Retirees.” In this first of two technology sessions, Apple representatives will demonstrate how to get the most out of the iPhone and iPod Touch. Tech Tools sessions are for those who do not own “smart” gadgets but are interested in learning whether they should. Those who already have an iPhone, iPod, or an iPad and want to learn how to exploit any to the fullest are also welcome to attend.

On June 4, 2012, Apple representatives will demonstrate how to use the iPad. RSVP for either session today!

Please note change in venue and time. For a fee, parking is available in the Oxford Road parking deck beneath the Oxford Building.
