Non-Citizen Temporary Extensions Available Beginning January 2, 2014

Eligibility
- The customer must be an existing DDS customer.
- The Georgia license, permit or ID the customer is applying for must have expired or must be expiring within thirty (30) days.
- Customers are not eligible for a non-citizen extension for a license, permit, or ID that is expired more than two years.
- The customer must provide proof of having requested an extension for time to remain lawfully within the United States.

Rules for Issuance of Non-Citizen Extensions
- Non-citizen customers can only receive extensions for licenses, permits, or IDs they already hold, except that upgrades from CP to D, D to C, and DM to CM are allowed. Other than these exceptions, no new classes or license types are allowed.
- Customers cannot upgrade from CP to C on a non-citizen extension.
- A customer is eligible for a 120-day extension once per license term. No renewals of the extension are permitted.
- If a customer has multiple existing documents, the customer may receive extensions for each of the documents. The fee is $50 per document (except for the document classes/types listed in the previous section for different amounts).

Proof of Request for Extension from DHS
- To be eligible for a non-citizen extension, the customer must have requested an extension from the U.S. Department of Homeland Security (DHS) for time to remain lawfully in the United States.
- The customer must present a Form I-797C from DHS which acknowledges receipt of the customer's application for an extension of stay in the United States. Copies are acceptable.

New Immigration Documents
- When a customer receives new immigration documents following issuance of a non-citizen extension, the customer can apply for renewal of any documents previously held, and issuance of any new documents desired.
- The customer can apply for new or renewed documents as soon as new valid immigration documents can be presented (they do not have to wait until the 120-day extension is over).
